Skills

- HTML/CSS/JavaScript
- Software testing
- XML/RSS
- Web server configuration
- Windows, Linux, macOS
- Technical writing
- Network administration
- Virtualization
- Logo design

Experience

Freelance

Front-end Web Developer

08/2023 – Present

As a developer, I have been creating static websites using vanilla HTML, CSS, and JavaScript. I have learned semantic markup, modern CSS features, and object oriented programming.

Helena Laboratories

Software QA Tester

05/2019 – 01/2022

As a software tester, I have outlined, written, and executed test cases for the verification and validation of medical diagnostic software. I have also performed manual testing, duplicating issues from the field, exploratory testing, describing, and tracking bugs using Helix ALM. I have a working knowledge of Oracle VirtualBox, Hyper-V, IIS, PostgreSQL (through pgAdmin), GIT, SVN, and MS Office; as well as other testing, administrative, and development tools.

Electronics QA Inspector

11/2017 – 05/2019

As an inspector, I operated medical diagnostic instruments according to procedure and inspected them according to parts list and print. I worked in a biohazardous laboratory environment and complied with safe lab practice while in contact with blood and other potentially hazardous materials.

The Computer Shack

Computer Repair Technician | IT Technician

11/2015 – 05/2017

As a computer technician, I troubleshoot, diagnosed, and repaired customers' computers and in-house refurbished systems. I have worked with Macs as well as PCs of various manufacturers, and have resolved hardware and software issues.

I created and managed domain networks as well as assisted in the physical installation of servers, Cat 6 cabling, and DVR systems on location.

Volunteer

I am currently the sound technician at my local church.
